

vertebrae	innervated organs	associated symptoms
C1	blood supply of the head - pituitary glands - scalp - facial bones - brain - inner and middle ear - sympathetic nervous system	headache - nervousness - insomnia - cold brain - migraine - depression - mental disorders - amnesia - epilepsy - chronic fatigue - dizziness or vertigo - hypertension: keystone of the spine
C2	eyes - optic nerve - auditory nerve - sinus - mastoid bone - tongue - forehead	sinusitis - allergies - deafness - eyes disorders - earache - fainting - some cases of blindness
C3	cheeks - external ears - facial bones - teeth - trigeminal nerve	neuralgia of the upper limbs - acne - buttons - eczema
C4	nose - lips - mouth - Eustachian	hay fever - catarrh - deafness - adenoids
C5	vocal cords - glands in the neck - pharynx	laryngitis - sore throat - hoarseness - angina
C6	neck muscles - shoulders - tonsils	torticollis - arm pain - tonsillitis
C7	thyroid gland - bursa shoulder - elbow	bursal - cold - wrong thyroid function
Th1	forearms - wrists - hands - fingers - esophageal - tracheal	asthma - cough - difficulty breathing - pain in the forearms and hands
Th2	heart - valves - coronary arteries	functional disorders of the heart and some chest pain
Th3	lung - bronchi - pleura - chest - breasts - nipples	bronchitis - pleurisy - pneumonia - congestion - flu - influenza
Th4	gallbladder and its canals	disorders of the gallbladder - jaundice
Th5	liver - solar plexus - blood	liver problems - anemia - poor circulation - arthritis - hypotension
Th6	stomach	various stomach troubles - dyspepsia - nervous dyspepsia
Th7	pancreas - Islets of Langerhans - duodenum	diabetes - ulcer - gastritis
Th8	diaphragm	hiccup
Th9	adrenals	allergies - urticaria
Th10	kidneys	kidney disorders - atherosclerosis - chronic fatigue - nephritis - pyelitis
Th11	kidneys and ureter	skin conditions: acne - buttons - eczema - auto-intoxication
Th12	small intestine - Fallopian tube - lymphatic circulation	bloating - some forms of infertility
L1	large intestine or colon - inguinal rings	constipation - colitis - dysentery
L2	appendage - abdomen - cecum - upper legs	appendicitis - cramps - difficulty breathing - acidosis - varices
L3	sexual organs - ovaries or testicles - uterus - knees	disorders of the bladder - painful or irregular menstruation - menopause - impotence - nocturnal urine incontinence - knee pain
L4	prostate - lumbar muscles - sciatic nerve	sciatica - lumbago - difficult urination, painful, frequent - low back pain
L5	lower legs: the ankles - feet - toes - arches	poor circulation in the legs - cold feet - weak legs and ankles - cramps
sacrum	ilium - the gluteal muscles	sacroiliac disorders - deviation of the spine
coccyx	rectum - anus	Hemorrhoids - pruritus or itching - pain at the base of the spine in sitting
